FIX THE CART DRAWER

The cart drawer is causing issues when I change the announcement bar, etc.
Please, **change it to a sidebar** with ease-in, ease-out transitions.
Keep the overlay making sure it's behind the header and announcement bar.
Kindly share the location of the transition effect, so we I can do the fine tuning.

DO NOT CHANGE IT ON MOBILE

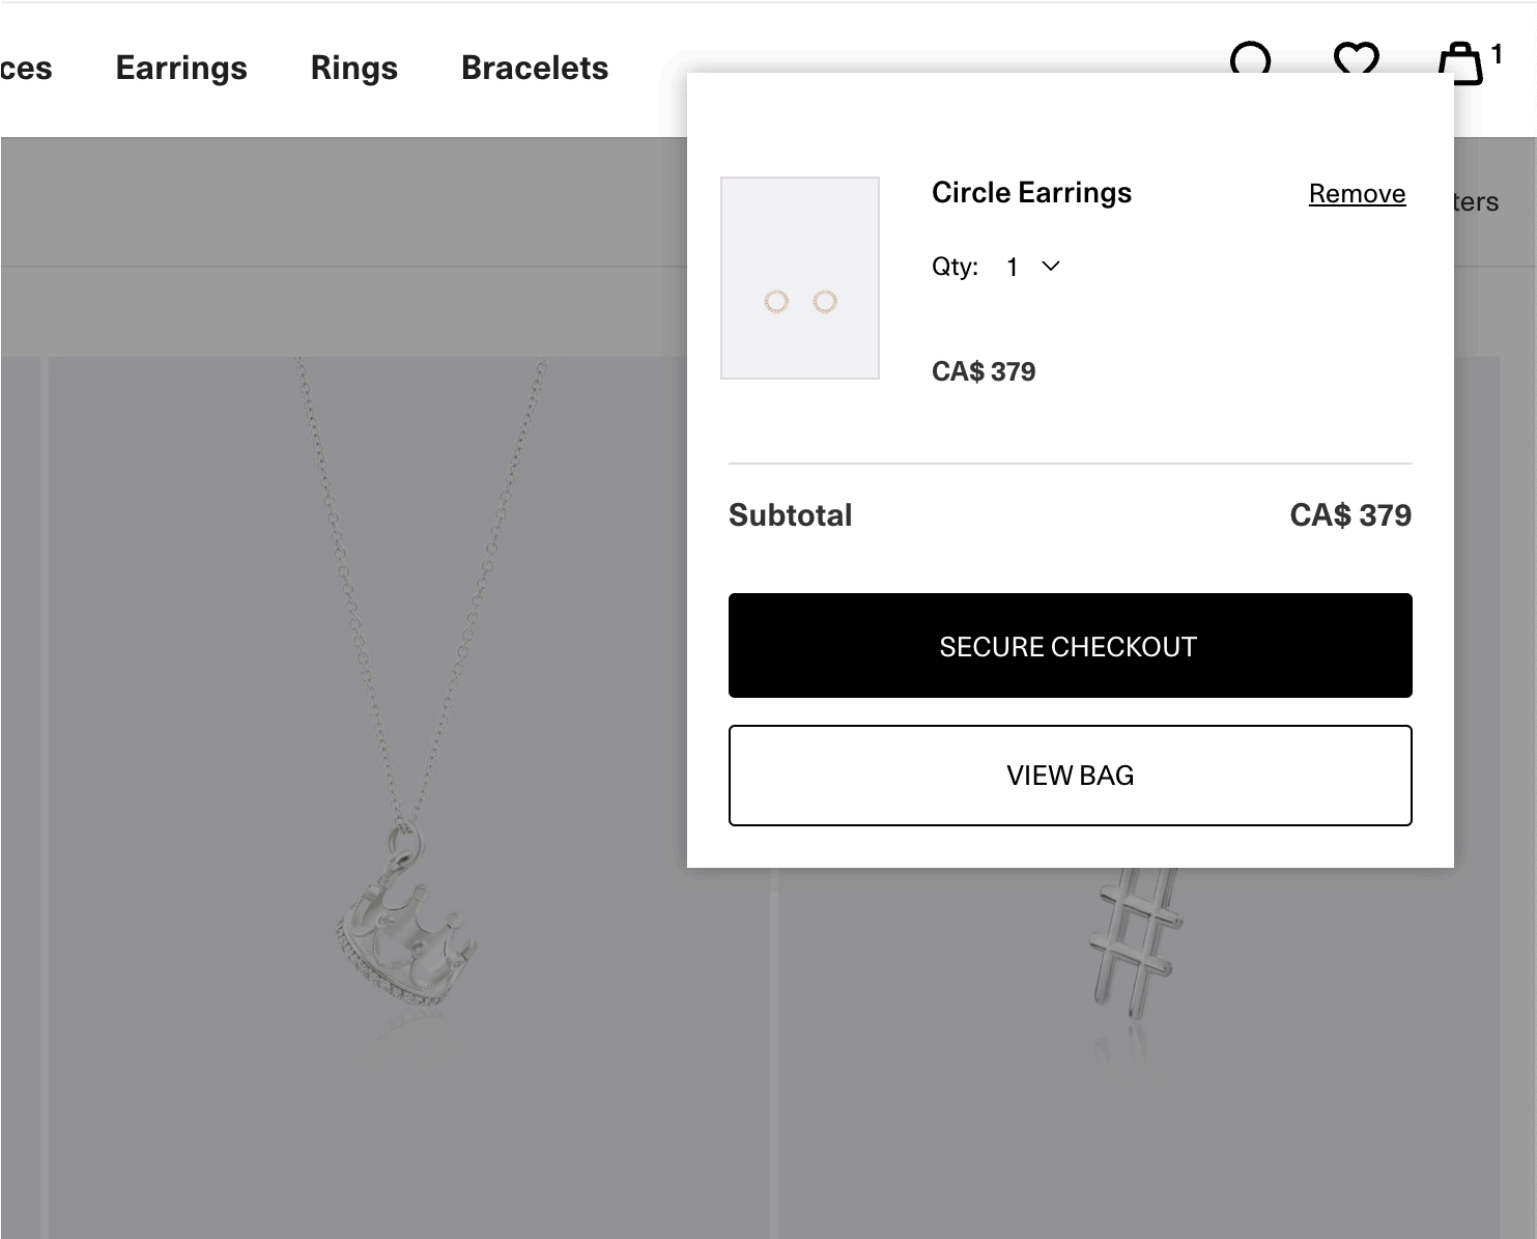

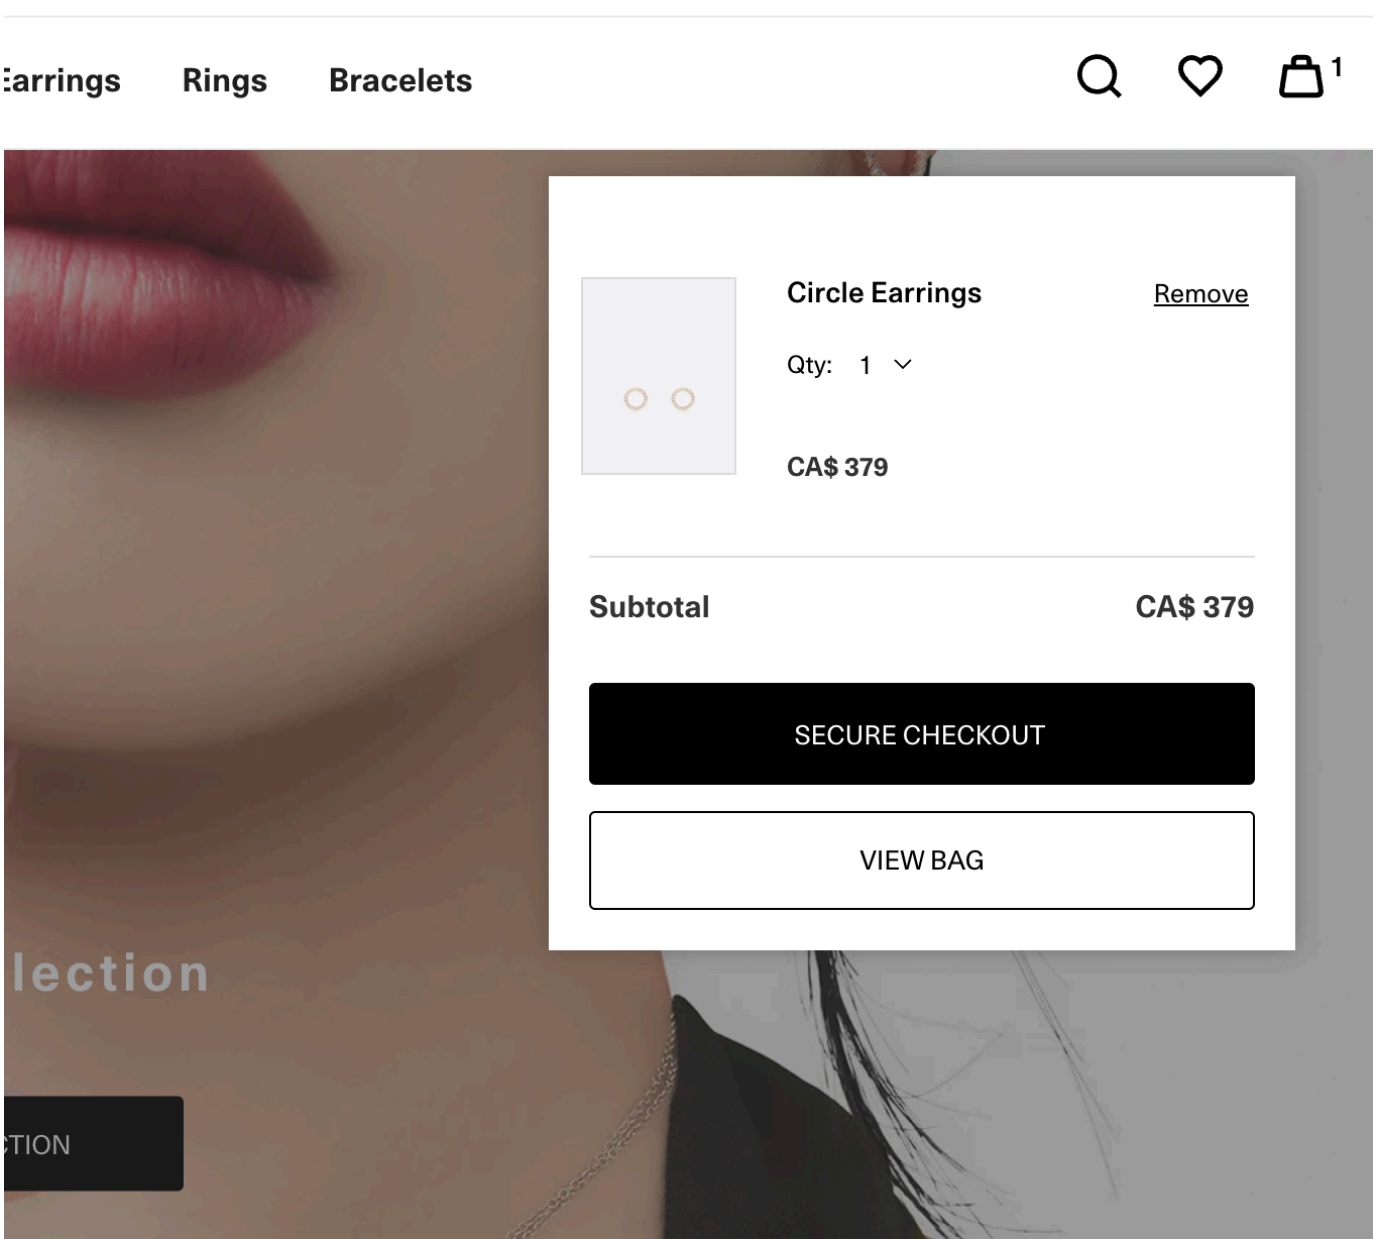

02

QUANTITY NUMBERS
DO NOT UPDATE

Both the cart-drawer (Now Sidebar) and the cart page do not update quantities. Please code it properly so when the same item is added twice or more, the numbers reflect it

Also, make sure the product image links back to the product.

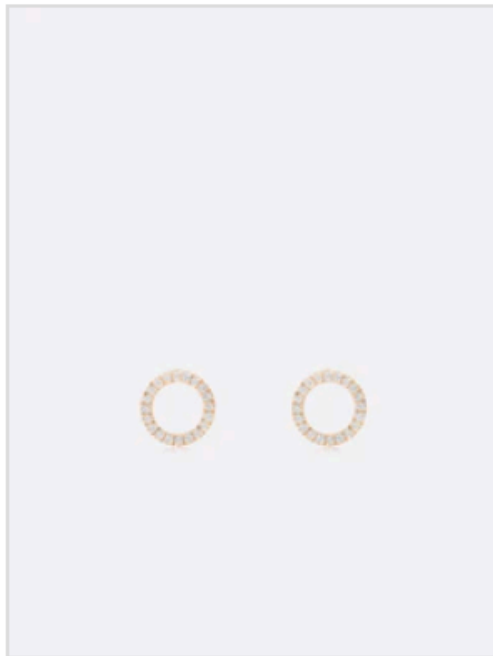

03

CART ORDER NOTE SECTION
NOT WORKING

You can remove the collapsible menu, make it visible and replace the proceed to checkout button, with submit Botton. Also, make sure the product image links back to the product.

04

SEARCH Z AXIS

I can fix this one on my own. Please make sure that search is always on top after changing the cart-drawer.

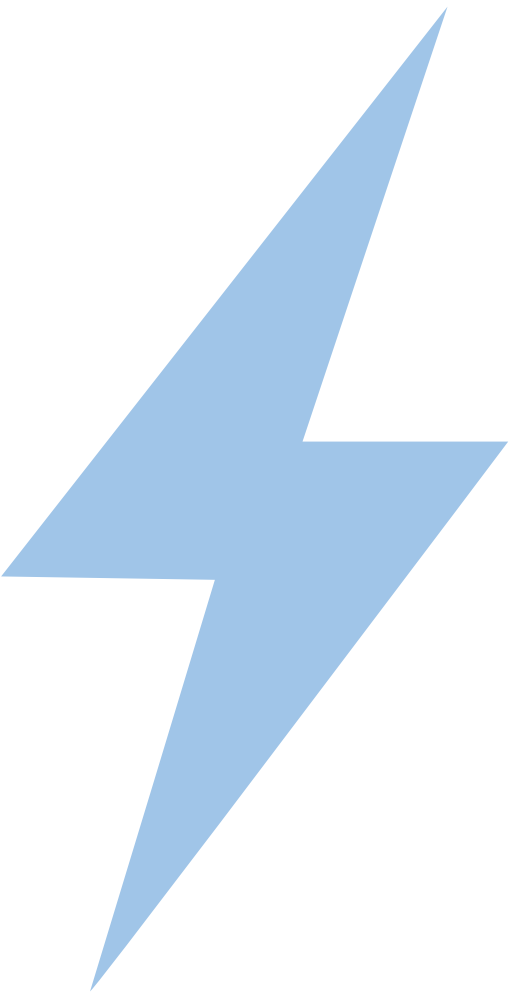

05

JAVASCRIPT BLOCK ON MOBILE IMAGES ?

There is a serious issue in mobile product pages where the carousel does not load at all.

All the elements are there, and it doesn't have to do with image sizes. Please fix it, if necessary, rebuild the carrousel.

MOBILE PRODUCT IMAGES

I need all mobile product images displayed as Squares. 1:1 Ratio, no lazyload, no image distortion. Site performance shouldn't get affected.

07

HOVER ANIMATION FOR PRODUCT PAGE BUY BUTTON

Right now I have two templates for products, I need the same black to white button animation on my product pages and cart drawer that is there on the cart page. I'll try to do it here but your help is greatly appreciated.

Thank you
